"We offer the CHARON software products to emulate the legendary Alpha, VAX, and PDP-11"

Core Value

Integrity

- We choose to be honest in all our business interactions and transactions and remain steadfast when challenged. We own up to our words and actions. When we commit to do something, we do it...decisively, responsibility, and with urgency so that others can rely on us consistently

Growth

- We show respect for everyone by what we say and do and value our diverse workforce. We excel at everything we do. We strive aggressively for the highest standard of quality to achieve superior value for our customers. We work together...energized by our collective talent. We listen to, trust, share with, and empower team members. We use data to move beyond individual opinions to rapid decisions and effective implementation

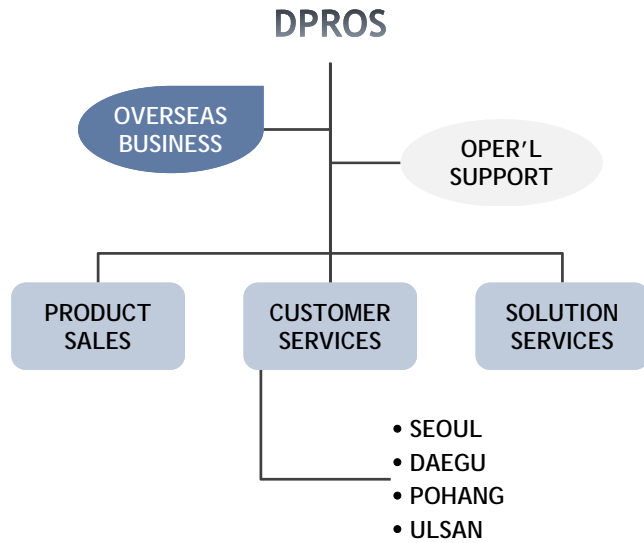

Customer Satisfaction

- We encourage and value creative solutions to customer needs. We are fearless in expressing unique ideas and taking actions that will generate successful customer solutions. We help our customers and business partners achieve their business goals through information systems knowledge, industry expertise, networking skills, and consulting. We strive always to outdistance the competition in customer satisfaction

"We offer the CHARON software products to emulate the legendary Alpha, VAX, and PDP-11"

Line of Business

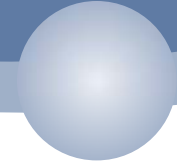

As an IT Solution Company

- Supplying Alpha, VAX & Windows based computer and solution services
- Providing professional support services including software support, hardware repairs and maintenance, training and consultancy.
- Developing tailor-made software packages in engineering applications
- Provide services to migrate existing applications currently running on older hardware to modern hardware and software platforms.

"We offer the CHARON software products to emulate the legendary Alpha, VAX, and PDP-11"

Product Sales & Services

- Can configure the most suitable design to address your computerisation requirements.
- Expertise in the repairs, service, and maintenance of Servers and their peripherals.
- Our staff are also experienced in the installation and maintenance of LAN and WAN equipment and accessories.

"We offer the CHARON software products to emulate the legendary Alpha, VAX, and PDP-11"

Application Development

- Expertise in development of customised software products
- Designing and development of customising packages in manufacturing automation sectors.
- Software tools used included various kind of DB engines, C, Fortran, and Visual Basic etc.
- Our products would run on Operating system that include Windows 2000, & XP, OpenVMS and Unix.
- Troubleshooting of software problems is a vital part of our support offerings to our clients, and is at the heart of our support engineers' activities.

"We offer the CHARON software products to emulate the legendary Alpha, VAX, and PDP-11"

Migration Services

- Platform Migration

Migrate existing applications currently running on older hardware to modern hardware and software platforms.

- Application Migration

Existing applications represent a significant investment, and a code migration is more economical and faster than a rewrite when upgrading to a new system environment. Manual source code conversion is too risky and expensive, particularly for large and mission-critical projects.

- CHARON-VAX/AXP Emulator

The CHARON-VAX/AXP family of products are VAX and Alpha replacement systems, running as a software application on industry standard Windows based systems.
